Anti-human CD19 scFv (FMC63) | PA007422.scFv

Catalog No.: PA007422.scFv | **Product Name:** Recombinant Anti-human CD19 scFv (Clone: FMC63) | **scFv Fragment / Recombinant Monoclonal Antibody**

Recombinant anti-human CD19 monoclonal antibody (Clone FMC63), engineered for flow cytometry applications and recombinantly expressed in mammalian cells. Variable regions are derived from the gold-standard mouse anti-human CD19 clone FMC63, providing high-affinity targeting of human B-lineage cells.

PRODUCT SPECIFICATIONS

Catalog No.	PA007422.scFv
Product Name	Recombinant Anti-human CD19 scFv (Clone: FMC63)
Supplier / Brand	Syd Labs, Inc. / Syd Labs
Clone	FMC63
Isotype	scFv
Source / Host	The recombinant anti-human CD19 scFv (clone FMC63) with His-tag at the C-terminus is produced in mammalian cells.
Specificity/Sensitivity	The recombinant anti-human CD19 scFv (clone: FMC63) specifically binds to the human CD19 protein.
Applications	ELISA and flow cytometry. (Endotoxin Level: < 1.0 EU/mg; Cell Surface Staining, CAR-T Research)
Form Of Antibody	0.2 μM filtered solution, pH 7.4, no stabilizers or preservatives.
Conjugate	Non-conjugated.
Purity	>95% by SDS-PAGE under reducing conditions.
Shipping	The FMC63 antibody is shipped with ice pack. Upon receipt, store it immediately at the temperature recommended below.
Stability & Storage	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 1 month from date of receipt, 2 to 8°C as supplied.
Note	Recombinant mouse IgG2a isotype controls and Recombinant human IgG1 isotype controls are available. Condition of sample preparation and optimal sample dilution should be determined experimentally by the investigator.

BACKGROUND & APPLICATION INFORMATION

PA007422.scFv: Recombinant Anti-human CD19 scFv (Clone: FMC63)

Recombinant human IgG1 monoclonal antibody with site-directed biotinylation through the Avi tag at the C-terminus of the antibody heavy chain.

The FMC63 antibody binds to the human CD19 protein, a transmembrane protein expressed in all B lineage cells including human plasma cells. CD19 plays two major roles in human B cells: it acts as an adaptor protein to recruit cytoplasmic signaling proteins to the membrane, and works within the CD19/CD21 complex to decrease the threshold for B cell receptor signaling pathways. CD19 is a biomarker for B lymphocyte development, lymphoma diagnosis and can be utilized as a target for leukemia immunotherapies.
