Biotinylated Anti-mouse MHC Class I (H-2Kb) Antibody (AF6-88.5.3, Human IgG1 Fc Silent Kappa) | PA007847.h1Fs-b

Catalog No.: PA007847.h1Fs-b | **Isotype:** Human IgG1 Fc Silent Kappa | **Flow Cytometry Grade**

Recombinant anti-mouse MHC Class I (H-2Kb) monoclonal antibody (Clone AF6-88.5, Biotinylated), engineered with a Human IgG1 Fc-Silent domain to minimize non-specific Fc receptor binding during cell surface analysis. Variable regions are derived from the classic mouse anti-mouse MHC Class I (H-2Kb) clone AF6-88.5 and recombinantly expressed in mammalian cells.

Product Specifications

Catalog No.	PA007847.h1Fs-b
Product Name	Biotinylated Recombinant Anti-mouse MHC Class I (H-2Kb) Monoclonal Antibody (Clone: AF6-88.5.3), Human IgG1 Fc Silent Kappa
Clone & Isotype	AF6-88.5.3 | Human IgG1 Fc Silent Kappa
Applications	Flow cytometry (FC) with various dye conjugation through streptavidin; conjugation to streptavidin agarose beads or streptavidin magnetic beads.
Reactivity & Specificity	Mouse MHC Class I (H-2Kb). The site-directed biotinylated recombinant AF6-88.5.3 antibody specifically binds to mouse MHC Class I (H-2Kb).
Source / Host	The site-directed biotinylated anti-mouse MHC Class I (H-2Kb) monoclonal antibody (clone: AF6-88.5.3) was produced in mammalian cells.
Formulation & Conjugate	0.2 uM filtered solution, pH 7.4, no stabilizers or preservatives. Biotin-conjugated.
Purity	**>95%** by SDS-PAGE under reducing conditions and HPLC.
Shipping	The recombinant anti-mouse MHC Class I (H-2Kb) monoclonal antibody of clone AF6-88.5.3 is shipped with ice pack. Upon receipt, store it immediately at the recommended temperature.
Stability & Storage	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 1 month from date of receipt, 2 to 8°C as supplied.

Biological Description & Background

Recombinant human IgG1 monoclonal antibody with site-directed biotinylation through the Avi tag at the C-terminus of the antibody heavy chain.

Major Histocompatibility Complex (MHC) Class I H-2Kb is a primary cell-surface glycoprotein expressed on virtually all nucleated cells in mice of the b haplotype (e.g., C57BL/6, C57BL/10, C3H.SW). It plays a crucial role in antigen presentation to CD8+ cytotoxic T lymphocytes and interacts with inhibitory and activating NK cell receptors.

Monoclonal antibody AF6-88.5.3 specifically recognizes the H-2Kb MHC Class I alloantigen. Engineered with a Human IgG1 Fc Silent domain, this antibody minimizes background Fc receptor interactions. Site-directed biotinylation via a C-terminal Avi tag guarantees uniform antibody orientation, enabling highly accurate detection, signal amplification, and cell separation using streptavidin-conjugated reagents in flow cytometry workflows.

Ordering & Technical Support

For custom volume ordering or inquiries, please visit the product webpage or contact our support team:
