Anti-mouse MHC Class I (H-2) Antibody (M1/42.3.9.8.HLK, Human IgG1 Fc Silent Kappa) | PA007812.h1Fs

Catalog No.: PA007812.h1Fs | **Isotype:** Human IgG1 Fc Silent Kappa | **Flow Cytometry / In Vivo Grade**

Recombinant anti-mouse MHC Class I (H-2) monoclonal antibody (Clone M1/42.3.9.8.HLK), engineered with a Human IgG1 Fc-Silent domain to eliminate ADCC/CDC and minimize non-specific Fc receptor binding during in vivo and in vitro studies. Variable regions are derived from the classic rat anti-mouse MHC Class I (H-2) clone M1/42.3.9.8.HLK and recombinantly expressed in mammalian cells.

Product Specifications

Catalog No.	PA007812.h1Fs
Product Name	Recombinant Anti-mouse MHC Class I (H-2) Monoclonal Antibody (Clone: M1/42.3.9.8.HLK), Human IgG1 Fc Silent Kappa
Clone & Isotype	M1/42.3.9.8.HLK | Human IgG1 Fc Silent Kappa
Applications	In Vivo Blocking, Flow cytometry (FC), Functional Assays, and Immunohistochemistry - Frozen (IHC-F).
Reactivity & Specificity	Mouse MHC Class I (H-2). The recombinant M1/42.3.9.8.HLK antibody specifically binds to mouse MHC Class I (H-2).
Source / Host	The anti-mouse MHC Class I (H-2) monoclonal antibody (clone: M1/42.3.9.8.HLK) was produced in mammalian cells.
Formulation & Conjugate	0.2 uM filtered solution, pH 7.4, no stabilizers or preservatives. Non-conjugated.
Purity & Endotoxin	**>95%** by SDS-PAGE under reducing conditions and HPLC. | **< 1.0 EU/mg** (Ultra-low, In Vivo Grade).
Shipping	The recombinant anti-mouse MHC Class I (H-2) monoclonal antibody of clone M1/42.3.9.8.HLK is shipped with ice pack. Upon receipt, store it immediately at the recommended temperature.
Stability & Storage	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 1 month from date of receipt, 2 to 8°C as supplied.

Biological Description & Background

Recombinant Human IgG1 Monoclonal Antibody with Fc silent mutation.

Major Histocompatibility Complex (MHC) Class I molecules are cell-surface glycoproteins expressed on virtually all nucleated cells in mice, responsible for presenting endogenous peptide antigens to CD8+ cytotoxic T cells and interacting with NK cell receptors.

Monoclonal antibody M1/42.3.9.8.HLK broadly recognizes mouse MHC Class I molecules (H-2 complex). Engineered with a Human IgG1 Fc Silent domain, this antibody eliminates ADCC/CDC effector functions and prevents non-specific interaction with Fc receptors, providing an optimal tool for receptor blocking, functional assays, and flow cytometry without inducing antibody-mediated target cell depletion.

Ordering & Technical Support

For custom volume ordering or inquiries, please visit the product webpage or contact our support team:

- **Product Webpage:** https://www.ushelf.com/anti-mouse-mhc-class-i-h-2-monoclonal-antibody-pa007812-h1fs/
