Anti-mouse MHC Class I (H-2Kd) Antibody (SF1-1.1.10, Mouse IgG2a Kappa) | PA007880.m2a

Catalog No.: PA007880.m2a | **Isotype:** Mouse IgG2a Kappa | **Flow Cytometry / In Vivo Grade**

Recombinant mouse anti-mouse MHC Class I (H-2Kd) monoclonal antibody (Clone SF1-1.1.1), engineered with a Mouse IgG2a Fc domain for target binding, antigen detection, and cell depletion studies. Variable regions are derived from the classic mouse anti-mouse MHC Class I (H-2Kd) clone SF1-1.1.1 and recombinantly expressed in mammalian cells.

Product Specifications

Catalog No.	PA007880.m2a
Product Name	Recombinant Anti-mouse MHC Class I (H-2Kd) Monoclonal Antibody (Clone: SF1-1.1.10), Mouse IgG2a Kappa
Clone & Isotype	SF1-1.1.10 | Mouse IgG2a Kappa
Applications	In Vivo Blocking/Depletion, Flow cytometry (FC), Functional Assays, and Immunohistochemistry - Frozen (IHC-F).
Reactivity & Specificity	Mouse MHC Class I (H-2Kd). The recombinant SF1-1.1.10 antibody specifically binds to mouse MHC Class I (H-2Kd).
Source / Host	The anti-mouse MHC Class I (H-2Kd) monoclonal antibody (clone: SF1-1.1.10) was produced in mammalian cells.
Formulation & Conjugate	0.2 uM filtered solution, pH 7.4, no stabilizers or preservatives. Non-conjugated.
Purity & Endotoxin	**>95%** by SDS-PAGE under reducing conditions and HPLC. | **< 1.0 EU/mg** (Ultra-low, In Vivo Grade).
Shipping	The recombinant anti-mouse MHC Class I (H-2Kd) monoclonal antibody of clone SF1-1.1.10 is shipped with ice pack. Upon receipt, store it immediately at the recommended temperature.
Stability & Storage	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 1 month from date of receipt, 2 to 8°C as supplied.

Biological Description & Background

Recombinant Mouse IgG2a Kappa Monoclonal Antibody.

Major Histocompatibility Complex (MHC) Class I H-2Kd is a cell-surface glycoprotein expressed on nucleated cells in mice of the d haplotype (e.g., BALB/c, NZB, B10.D2). It presents endogenous peptides to CD8+ cytotoxic T cells and acts as a ligand for NK cell receptors, playing a pivotal role in cellular immunity and transplantation biology.

Monoclonal antibody SF1-1.1.10 specifically reacts with the mouse H-2Kd MHC Class I alloantigen. Recombinantly expressed in mammalian cells with a low-endotoxin Mouse IgG2a framework, this antibody provides optimal performance in flow cytometry, in vivo cell depletion/blocking, and immunological functional assays.

Ordering & Technical Support

For custom volume ordering or inquiries, please visit the product webpage or contact our support team:

- **Product Webpage:** https://www.ushelf.com/anti-mouse-mhc-class-i-h-2kd-monoclonal-antibody-pa007880-m2a/
