

## Anti-human CD64 Antibody (Clone: M22) | PA007393.m1

**Catalog No.:** PA007393.m1 | **Isotype:** Mouse IgG1 Kappa | **In Vivo Grade**

The human CD64 Fc blocking antibody (M22 or H22 Fc blocking antibody) is an anti-human Fc receptor antibody for human FcR blocking reagent. Various isotypes are available for certain applications. Condition of sample preparation and optimal sample dilution should be determined experimentally by the investigator.

| <b>Product Name</b>            | In vivo Grade Recombinant Anti-human CD64 Monoclonal Antibody, Mouse IgG1 Kappa (Clone: M22)                                                                                                                                                                                                              |
| <b>Clone &amp; Isotype</b>     | M22.   Mouse IgG1 Kappa                                                                                                                                                                                                                                                                                   |
| <b>Applications</b>            | ELISA, flow cytometry, neutralization, functional assays such as bioanalytical PK and ADA assays, and those assays for studying biological pathways affected by the human CD64 protein. Human Fc receptor blocking solution, human Fc receptor blocking reagent, and human Fc receptor blocking antibody. |
| <b>Immunogen / Host</b>        | The anti-human CD64 monoclonal antibody (clone: M22) was produced in mammalian cells.                                                                                                                                                                                                                     |
| <b>Purity &amp; Endotoxin</b>  | >95% by SDS-PAGE under reducing conditions and HPLC   < 1 EU per 1 mg of the protein by the LAL method.                                                                                                                                                                                                   |
| <b>Formulation</b>             | 0.2 uM filtered solution, pH 7.4, no stabilizers or preservatives.                                                                                                                                                                                                                                        |
| <b>Stability &amp; Storage</b> | Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 1 month from date of receipt, 2 to 8°C as supplied.                                                                                                                         |

### Biological Description & Research Applications

The in vivo grade recombinant mouse monoclonal antibody (clone: M22) specifically binds to human CD64.

Recombinant Anti-human CD64 Monoclonal Antibody (Clone: M22), Mouse IgG1 Kappa, In vivo Grade.

### Ordering & Technical Support

For custom volume ordering or inquiries, please visit the product webpage or contact our support team:
