

Anti-Mouse TCR V gamma 2 Antibody (Clone: UC3-10A6) | PA007571.hs

Catalog No.: PA007571.hs | Isotype: Armenian hamster IgG Kappa | In Vivo Grade

Recombinant Mouse IgG2a isotype controls, Recombinant Hamster IgG1 isotype controls and Recombinant Hamster IgG2 isotype controls are available. Condition of sample preparation and optimal sample dilution should be determined experimentally by the investigator.

| Catalog No.         | PA007571.hs                                                                                                                                                                       |
| Product Name        | In Vivo Grade Recombinant Anti-mouse TCR V gamma 2 Monoclonal Antibody (Clone: UC3-10A6), Armenian hamster IgG Kappa                                                              |
| Clone & Isotype     | UC3-10A6.   Armenian hamster IgG Kappa                                                                                                                                            |
| Synonyms            | V gamma 2 T-cell receptor, T cell receptor gamma 2, TCR V gamma 4                                                                                                                 |
| Applications        | ELISA, neutralization, functional assays such as bioanalytical PK and ADA assays, and those assays for studying biological pathways affected by the mouse TCR V gamma 2 protein.  |
| Immunogen           | The anti-mouse TCR V gamma 2 monoclonal antibody (clone: UC3-10A6) was produced in mammalian cells.                                                                               |
| Purity & Endotoxin  | >95% by SDS-PAGE under reducing conditions and HPLC   < 1 EU per 1 mg of the protein by the LAL method.                                                                           |
| Formulation         | 0.2 uM filtered solution, pH 7.4, no stabilizers or preservatives.                                                                                                                |
| Stability & Storage | Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 1 month from date of receipt, 2 to 8°C as supplied. |

Biological Description & Research Applications

Recombinant hamster IgG Monoclonal Antibody.

Ordering & Technical Support

For custom volume ordering or inquiries, please visit the product webpage or contact our support team:
