Mouse IgG2b Fc Protein | BP4121

Catalog No.: BP4121 | **Product Name:** In Vivo Grade Recombinant Mouse IgG2b Fc Protein | **In Vivo Grade / Recombinant Protein**

In vivo grade recombinant natural and engineered mouse IgG2b Fc proteins (mIgG2b Fc), and recombinant mouse IgG2b isotype control antibody and mutants are available. Biotinylated mIgG2b Fc, and mIgG2b Fc with Avi-, His-, and Flag-tags are also available.

Product Specifications

Catalog No.	BP4121
Product Name	In Vivo Grade Recombinant Mouse IgG2b Fc Protein
Synonyms	Mouse Fc protein (IgG2b), Mouse IgG2b Fc region, Recombinant mIgG2b Fc Protein
Summary	The In Vivo Grade Recombinant Mouse IgG2b Fc Protein was produced in mammalian cells and purified by protein A. The mIgG2b Fc protein includes the CH2 (126-225) and CH3 (234-330) domains of the heavy chain constant region as well as the hinge region (98-125) before the CH2 domain.
Source / Host	Mammalian cells / Mouse
Formulation	0.2 uM filtered solution of 1x PBS. Non-conjugated.
Endotoxin	Less than 1 EU/mg of protein as determined by LAL method.
Purity	**>95%** by SDS-PAGE under reducing conditions.

Biological Description & Background

BP4121: Recombinant Mouse IgG2b Fc Protein, In Vivo Grade.

In vivo grade recombinant natural and engineered mouse IgG2b Fc proteins (mIgG2b Fc), and recombinant mouse IgG2b isotype control antibody and mutants are available. Biotinylated mIgG2b Fc, and mIgG2b Fc with Avi-, His-, and Flag-tags are also available. Please contact us to ask for a quote for the engineered mouse IgG2b Fc proteins, biotinylated mIgG2b Fc, and mIgG2b Fc with Avi-, His-, and Flag-tags. The recombinant mouse IgG2b Fc protein and mutants can be used as the isotype control of the mIgG2b antibodies and the mIgG2b Fc fusion proteins in various in vitro and in vivo experiments.

The in vivo grade recombinant mouse IgG2b Fc protein (mIgG2b Fc, Glu 97 - Lys 335 of the constant region of the IgG2b heavy chain, Accession # P01867-2) was produced in mammalian cells and purified by protein A. The mIgG2b Fc protein includes the CH2 (126-225) and CH3 (234-330) domains of the heavy chain constant region as well as the hinge region (98-125) before the CH2 domain.

For human T cell research, Syd Labs OKT3 antibodies are also available.

Ordering & Technical Support

For custom volume ordering or inquiries, please visit the product webpage or contact our support team:

- **Product Webpage:** https://www.ushelf.com/mouse-igg2b-fc-protein-bp4121/
- **Order Phone:** 1-617-401-8149 | **Fax:** 1-617-606-5022
- **Support Email:** message@sydlabs.com
