Rat IgG1 Isotype Control Antibody (Clone: 12B9) | PA007142.05

Catalog No.: PA007142.05 | **Product Name:** In Vivo Grade Recombinant Rat IgG1 Isotype Control Antibody, Endotoxin 0.05 EU/mg | **In Vivo Grade / Recombinant Antibody**

Recombinant rat IgG1 kappa isotype control good for in vitro and in vivo studies. Low or no specific binding to mouse samples tested. Mouse variable regions and rat IgG1 kappa constant regions.

Product Specifications

Catalog No.	PA007142.05
Product Name	In Vivo Grade Recombinant Rat IgG1 Isotype Control Antibody, Endotoxin 0.05 EU/mg
Synonyms	Recombinant Rat IgG1 Isotype Control, Rat IgG1 Negative Control Antibody, rtIgG1 Isotype Control
Summary	The In Vivo Grade Recombinant Rat IgG1 Isotype Control Antibody, Endotoxin 0.05 EU/mg was produced in CHO cells.
Clone	12B9
Isotype	rat IgG1, kappa
Applications	an isotype-matched negative control for rat IgG1 kappa antibodies used in ELISA, Western Blot (WB), Flow Cytometry (Flow), Immunoprecipitation (IP), Immunohistochemistry (Paraffin) (IHC (P)), Immunohistochemistry (Frozen) (IHC (F)), and in vivo animal model research.
Immunogen	N/A.
Source / Host	CHO cells / Rat
Formulation	0.2 uM filtered solution of 1x PBS. Non-conjugated.
Endotoxin	< 0.05 EU per 1 mg of protein as determined by LAL method.
Purity	**>95%** by SDS-PAGE under reducing conditions.

Biological Description & Background

PA007142.05: Recombinant Rat IgG1 Isotype Control Antibody (Clone: 12B9), In Vivo Grade.

Rat IgG1 isotype control and mutants (natural and engineered rtIgG1 isotype controls) are useful for functional study using animal model among a number of in vitro and in vivo research applications from ELISA, Western Blot (WB) to cell-based assays. Rat IgG1 and IgG2a antibodies are more like mouse IgG1 than rat IgG2b antibodies. Most of rat antibodies are used to study mouse target proteins.

Please contact us to ask for a quote for the engineered such as Fc silenced rat IgG1 isotype control mutants, rtIgG1 isotype control and mutants with Avi-, His-, and Flag-tags, and biotinylated rtIgG1 isotype control and mutants. A variety of conjugates (such as dyes and fluorophores) with the rat IgG1 isotype control and Fc silenced mutants are available.

For human T cell research, Syd Labs OKT3 antibodies are also available.

Ordering & Technical Support

For custom volume ordering or inquiries, please visit the product webpage or contact our support team:
