NMab Pro Protein A Resin | Catalog IA121

Syd Labs NMab Pro Protein A Resin IA121, economical alkaline-stable protein A resin or protein A bead, NMab Pro protein A affinity resin with high dynamic binding capacity: 60 – 80 mg/mL (human IgG, 4 minute residence time). Clean in Place: 0.1-0.5 M NaOH. Recombinant alkaline-stable protein A resins are looking for distributors.

Product Specifications

Catalog No.	IA121
Product Name	NMab Pro Protein A Resin
Supplier Name	Syd Labs, Inc.
Brand Name	Syd Labs
Synonyms	Protein A Agarose Resins
Summary	Our NMab Pro protein A affinity resin product range offers end users cost competitive and high performance Protein A affinity resins.

Performance & CIP

Dynamic Binding Capacity	60 – 80 mg/mL (human IgG, 4 minute residence time).
Clean in Place (CIP)	0.1-0.5 M NaOH.
Stability	Alkaline-stable recombinant Protein A ligands.

Background & Description

Our alkaline-stable recombinant protein A ligands are immobilized onto our proprietary agarose base matrices to provide cost-effective solutions for fast-processing of monoclonal and polyclonal antibodies, bispecific antibodies, and Fc fusion constructs with high quality.
